2019 Jeep Cherokee Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Small overlap front: driver-side

Tested vehicle: **2019 Jeep Cherokee Latitude 4-door 4wd**
Rating applies to 2019-23 models built after April 2018

The Jeep Cherokee was re-engineered and restyled for the 2019 model year. Beginning with the 2019 model year, the A-pillars, front door hinge pillars, and door sills were modified to improve occupant protection in moderate overlap and small overlap frontal crashes.

Beginning with 2019 models built after April 2018, the driver seat belt was modified to further improve protection in small overlap frontal crashes. (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar.)

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained very well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

The driver's space was maintained well, and risk of injuries to the dummy's legs and feet was low.

Small overlap front: passenger-side

Tested vehicle: **2019 Jeep Cherokee Latitude Plus 4-door 4wd**

Rating applies to 2019-23 models

The Jeep Cherokee was re-engineered and restyled for the 2019 model year. Beginning with the 2019 model year, the A-pillars, front door hinge pillars, and door sills were modified to improve occupant protection in moderate overlap and small overlap frontal

crashes.

Passenger-side small overlap frontal ratings are assigned by the Institute based on a test conducted by Fiat Chrysler.

Side: original test

Tested vehicle: **2019 Jeep Cherokee Latitude 4-door 4wd with standard front and rear head curtain airbags, front seat-mounted torso airbags, and rear seat-mounted pelvis airbags**

Rating applies to 2014-23 models

The Jeep Cherokee was re-introduced for the 2014 model year after last being sold in the U.S. as a 2001 model. Beginning with the 2019 model year, the Cherokee was re-engineered and restyled, but no changes affecting side crashworthiness were made. Therefore the results of two side tests of the Cherokee were combined, one of a 2014 model by the Institute and the other of a 2019 model by Fiat Chrysler. Ratings are based on both tests, but the vehicle specifications shown below are based on Fiat Chrysler's test.

Headlights

Ratings are given for 4 different headlight variations available on this vehicle.

(1) Trim level(s): Limited trim equipped with Technology Group package, High Altitude trim equipped with Technology Group package, Overland trim equipped with Technology Group package, Trailhawk Elite trim equipped with Technology Group package

Low-beam headlight type	LED projector
High-beam headlight type	LED projector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	A

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was fair on the left side of the road and inadequate on the right side. On curves, visibility was good on both right curves, fair on the sharp left curve and inadequate on the gradual left curve.

The low beams never exceeded glare limits.

High beams

On the straightaway, visibility was good on the right side of the road and inadequate on the left side. On curves, visibility was fair on both right curves and inadequate on both left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway and all 4 curves.
