About AutoCheck

AutoCheck vehicle history reports by Experian Automotive is the leading vehicle history reporting service. With expert data handling, the Experian Automotive database houses over 4 billion records on a half a billion vehicles. Every AutoCheck vehicle history report will give you confidence when buying or selling your next used vehicle, with superior customer service every step of the way.

Patent Notice

Certain aspects of this vehicle history report may be covered by U.S. Patent 8,005,759.

Here is a list of some major defects that may occur in used vehicles.

Frame & Body

Frame-cracks, corrective welds, or rusted through
Dog tracks—bent or twisted frame

Engine

Oil leakage, excluding normal seepage
Cracked block or head
Belts missing or inoperable
Knocks or misses related to camshaft lifters and push rods
Abnormal exhaust discharge

Transmission & Drive Shaft

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged case which is visible
Abnormal noise or vibration caused by faulty transmission or drive shaft
Improper shifting or functioning in any gear
Manual clutch slips or chatters

Differential

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged housing which is visible
Abnormal noise or vibration caused by faulty differential

Cooling System

Leakage including radiator
Improperly functioning water pump

Electrical System

Battery leakage
Improperly functioning alternator, generator, battery, or starter

Fuel System

Visible leakage

Inoperable Accessories

Gauges or warning devices
Air conditioner
Heater & Defroster

Brake System

Failure warning light broken
Pedal not firm under pressure (DOT spec.)
Not enough pedal reserve (DOT spec.)
Does not stop vehicle in straight line (DOT spec.)
Hoses damaged
Drum or rotor too thin (Mfr. Specs)
Lining or pad thickness less than 1/32 inch
Power unit not operating or leaking
Structural or mechanical parts damaged

Air Bags

Steering System

Too much free play at steering wheel (DOT specs.)
Free play in linkage more than 1/4 inch
Steering gear binds or jams
Front wheels aligned improperly (DOT specs.)
Power unit belts cracked or slipping
Power unit fluid level improper

Suspension System

Ball joint seals damaged
Structural parts bent or damaged
Stabilizer bar disconnected
Spring broken
Shock absorber mounting loose
Rubber bushings damaged or missing
Radius rod damaged or missing
Shock absorber leaking or functioning improperly

Tires

Tread depth less than 2/32 inch
Sizes mismatched
Visible damage

Wheels

Visible cracks, damage or repairs
Mounting bolts loose or missing

Exhaust System

Leakage
Catalytic Converter

2012 Jeep Wrangler Review

 By **KBB Editors** ⓘ
Updated December 23, 2019

Pros

If you enjoy outdoor activities, the 2012 Jeep Wrangler is your round-trip ticket to the trailhead, ski slope or beach. And if you enjoy the Jeep-specific pursuit of boulder hopping, this newest iteration of the Wrangler – and newish iteration of the four-door Unlimited SUV – won't disappoint.

Cons

The 2012 Jeep Wrangler is engineered to deliver credible off-road SUV capability. To that end, its on-road demeanor is necessarily compromised. Both its separate frame and live axles (front and rear) enhance off-road performance, while compromising on-road stability (heavier unsprung weight from live axles) and performance (heavier curb weight – typically – with a separate frame) when compared to today's pavement-specific crossover SUVs.

What's New?

The improvements found in the 2012 Jeep Wrangler can be summed up with one number: 285. That horsepower figure, from a new (for the Wrangler SUV) 3.6-liter V6, constitutes a 40-percent improvement as compared to its 202-horsepower predecessor. And when connected to the Wrangler's new five-speed automatic (a six-speed manual transmission is the standard gearbox), the powertrain produces both better performance (zero-to-60 times are improved by two to three seconds) and fuel efficiency.

Iconic may be an overused descriptive, but the 2012 Jeep Wrangler SUV wears it well. Some 65 years after the end of World War II, civilians continue to embrace the same basic recipe of affordable four-wheel drive, despite the Jeep's increased size, capability and – at a base price of

Unlimited Rubicon Sport Utility 4D	\$9,900	\$13,550	\$14,950

Values above are based on "Good" condition vehicles ⓘ. Estimated Trade-In Values range from about \$6,550 to \$9,900 depending on vehicle style. Estimated Private Party Values range from about \$11,200 to \$13,550 depending on vehicle style. Values and prices are based on national averages and typical mileage for this model, but they can vary greatly according to mileage, condition, location, and other factors. Valid through 6/4/2026.

Trade-In Value

Trade-In Value is the amount you can expect to receive this week when trading in your vehicle at a dealership.

Private Party Value

Private Party Value is the fair price you can expect when selling your car to an individual, not to a dealer.

Fair Purchase Price

Fair Purchase Price shows what others in your area are actually paying for this vehicle.

FAQs

What is the MPG for a 2012 Jeep Wrangler?

2012 Jeep Wrangler city/highway fuel economy ratings range from 16/20 mpg to 17/21 mpg, depending on trim and equipment.

How much should a 2012 Jeep Wrangler cost?

Used 2012 Jeep Wrangler prices currently range from \$12,350 for the Sahara Sport Utility 2D to \$14,950 for the Unlimited Rubicon Sport Utility 4D when purchasing from a dealership, depending on a range of factors like equipment, mileage, and condition.

What's the cheapest Jeep Wrangler?

The cheapest 2012 Jeep Wrangler is the Sahara Sport Utility 2D, with a Kelley Blue Book Fair Purchase Price of \$12,350.

Is the 2012 Jeep Wrangler reliable?

The 2012 Jeep Wrangler is part of the 3rd-generation Wrangler, which our owners give an above-average reliability rating of 4.6 out of 5.

G	Good	Superior
A	Acceptable	Advanced
M	Marginal	Basic
P	Poor	

Some ratings use a scale of Poor to Good. Others range from Basic to Superior.

Small overlap front: driver-side

Tested vehicle: 2013 Jeep Wrangler Sport 2-door 4wd
Rating applies to 2007-17 models

The Jeep Wrangler was redesigned for the 2007 model year. For the 2018 model year only, the Wrangler was renamed the Wrangler JK, because the JK was built concurrently through much of the same model year as the redesigned 2018 Wrangler. These ratings apply only to the 2007-17 Wrangler and 2018 Wrangler JK.

----------------	----------

Driver restraints and dummy kinematics	
---	--

The dummy's movement was well controlled. The dummy's head loaded the frontal airbag, which stayed in front of the dummy until rebound. However, the Wrangler is one of a handful of passenger vehicles still sold without standard side airbags to protect the head and chest from contact with side structure and outside objects.	A
--	----------

Action shot taken during the small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained reasonably well.

The dummy's movement was well controlled. The dummy's head loaded the frontal airbag, which stayed in front of the dummy until rebound. However, the vehicle lacks standard side airbags to protect the head and chest from contact with side structure and outside objects.

Intrusion of the instrument panel and footwell was sufficient to contribute to a high risk of injuries to the left knee, both thighs, and the left lower leg and a moderate risk of injury to the left foot.

► Technical measurements for this test

Moderate overlap front: original test

Tested vehicle: **2007 Jeep Wrangler X 2-door 4wd**

Rating applies to 2007-17 models

The Jeep Wrangler was redesigned for the 2007 model year. A larger, heavier 4-door model was added for the first time, but the front ends of the 4-door and 2-door are very similar. For the 2018 model year only, the Wrangler was renamed the Wrangler JK, because the JK was built concurrently through much of the same model year as the redesigned 2018 Wrangler.

The Institute tested the 4-door Wrangler first, which received a Good overall frontal crash test rating. Therefore, frontal ratings for the 2-door are assigned by the Institute based on a test conducted by Chrysler. These ratings apply only to the 2007-17 Wrangler and 2018 Wrangler JK.

---	----------

► Technical measurements for this test

Side: original test

Tested vehicle: **2008 Jeep Wrangler Sahara 2-door 4wd without optional side airbags**

Rating applies to 2007-17 models

The Jeep Wrangler was redesigned for the 2007 model year. For the 2018 model year only, the Wrangler was renamed the Wrangler JK, because the JK was built concurrently through much of the same model year as the redesigned 2018 Wrangler. These ratings apply only to the 2007-17 Wrangler and 2018 Wrangler JK.

During the crash, the driver door opened. This opening didn't significantly affect dummy movement during the test but shouldn't happen because, in some crashes, it could allow partial or complete occupant ejection, especially if the occupant is unbelted. This door opening resulted in a structure rating downgrade from good to acceptable.

Pelvis/leg

M

Driver head protection

Although the intruding barrier did not hit the dummy's head in this test, the head was not protected from contacts outside the vehicle. This indicates that only slightly different crash circumstances could produce a direct hit to a person's head.

Pelvis/leg

G

Rear passenger head protection

The dummy's head was hit by the diagonal steel tube supporting the convertible top. This impact did not produce high head injury measures, but the head protection is inadequate.

M

View of the vehicle and barrier just after the crash test, showing the open driver door.

View of the vehicle after the crash with door removed, showing damage to the occupant compartment.

Although the dummy's head was not hit by the barrier, shattering glass from the side window left deep gouges on the top of the head.

Smeared greasepaint shows where the rear passenger dummy's head was hit by the diagonal steel tube supporting the convertible top.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by [these auto insurers and insurance associations](#).
