2024 Toyota Corolla Review

By Eric Brandt ⓘ

Updated January 30, 2025

Pros

- Lots of standard safety tech
- Great fuel economy
- Good resale value

Cons

- Rivals are roomier

What's New?

- Nightshade trim

The Toyota Corolla has been in continuous production since 1966. In that time, it's become a benchmark for safe, reliable, and practical personal transportation. Now in its 12th generation, the Corolla builds on that reputation with a modern spin on a proven formula. The styling and technology are thoroughly modern, but the Corolla still impresses on its historic strong suits with excellent safety scores and outstanding fuel economy.

The 50-mpg [Corolla Hybrid](#) sedan and sporty, flexible [Corolla Hatchback](#) are reviewed separately.

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Key

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2019 Toyota Corolla SE 4-door hatchback**
Rating applies to 2019-26 models

The Toyota Corolla hatchback was redesigned for the 2019 model year. It replaces the Corolla iM hatchback. The Toyota Corolla sedan was redesigned for the 2020 model year (the listed ratings do not apply to the 2019 Corolla sedan). Driver-side small overlap frontal ratings are assigned by the Institute based on a test of a 2019 Corolla hatchback conducted by Toyota.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head approached the front seatback, which increases the risk of head injuries.

Rear passenger dummy injury values indicate a low risk of injury to the head or neck and chest. During the crash, the shoulder belt remained in an ideal position on the dummy's chest.

The rear passenger dummy's lap belt moved from the ideal position on the pelvis onto the abdomen, increasing the risk of abdominal injuries.

Headlights

Ratings are given for **2 different headlight variations** available on this vehicle.

(1) Trim level(s): Hybrid LE trim, SE trim, Hybrid SE trim, Hybrid XLE trim, XSE trim

Low-beam headlight type	LED projector
High-beam headlight type	LED projector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	G

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the gradual left and both right curves and fair on the sharp left curve.

The low beams created some glare.

High beams

On the straightaway, visibility was good on the left side of the road and fair on the right side. On curves, visibility was good on the gradual right and both left curves and fair on the sharp right curve.

High-beam assist compensates for some limitations of this vehicle's low beams on both left curves.

Low-beam headlight type	LED projector
High-beam headlight type	LED projector

Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	G

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the gradual right curve and fair on the sharp right and both left curves.

The low beams never exceeded glare limits.

High beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was fair on the gradual right and gradual left curves and inadequate on the sharp right and sharp left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on both left curves and on both right curves.
