About AutoCheck

AutoCheck vehicle history reports by Experian Automotive is the leading vehicle history reporting service. With expert data handling, the Experian Automotive database houses over 4 billion records on a half a billion vehicles. Every AutoCheck vehicle history report will give you confidence when buying or selling your next used vehicle, with superior customer service every step of the way.

Patent Notice

Certain aspects of this vehicle history report may be covered by U.S. Patent 8,005,759.

Here is a list of some major defects that may occur in used vehicles.

Frame & Body

Frame-cracks, corrective welds, or rusted through
Dog tracks—bent or twisted frame

Engine

Oil leakage, excluding normal seepage
Cracked block or head
Belts missing or inoperable
Knocks or misses related to camshaft lifters and push rods
Abnormal exhaust discharge

Transmission & Drive Shaft

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged case which is visible
Abnormal noise or vibration caused by faulty transmission or drive shaft
Improper shifting or functioning in any gear
Manual clutch slips or chatters

Differential

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged housing which is visible
Abnormal noise or vibration caused by faulty differential

Cooling System

Leakage including radiator
Improperly functioning water pump

Electrical System

Battery leakage
Improperly functioning alternator, generator, battery, or starter

Fuel System

Visible leakage

Inoperable Accessories

Gauges or warning devices
Air conditioner
Heater & Defroster

Brake System

Failure warning light broken
Pedal not firm under pressure (DOT spec.)
Not enough pedal reserve (DOT spec.)
Does not stop vehicle in straight line (DOT spec.)
Hoses damaged
Drum or rotor too thin (Mfr. Specs)
Lining or pad thickness less than 1/32 inch
Power unit not operating or leaking
Structural or mechanical parts damaged

Air Bags

Steering System

Too much free play at steering wheel (DOT specs.)
Free play in linkage more than 1/4 inch
Steering gear binds or jams
Front wheels aligned improperly (DOT specs.)
Power unit belts cracked or slipping
Power unit fluid level improper

Suspension System

Ball joint seals damaged
Structural parts bent or damaged
Stabilizer bar disconnected
Spring broken
Shock absorber mounting loose
Rubber bushings damaged or missing
Radius rod damaged or missing
Shock absorber leaking or functioning improperly

Tires

Tread depth less than 2/32 inch
Sizes mismatched
Visible damage

Wheels

Visible cracks, damage or repairs
Mounting bolts loose or missing

Exhaust System

Leakage
Catalytic Converter

2013 Jeep Grand Cherokee Review

By **KBB Editors** ⓘ

Updated December 23, 2019

Pros

Whether you require the tenacious traction afforded by the Grand Cherokee's three available 4WD systems, or just the controlled balance and handling of the 2WD version, both come wrapped in a solid package with the highest quality materials yet placed in a Jeep.

Cons

If room for seven or fuel economy better than 23 mpg top your demands, the 2013 Grand Cherokee won't pass muster. Those looking to keep the price south of \$30K may be in for sticker shock once more desirable options are added.

What's New?

For 2013, the Overland Summit models gain Front Park Assist, power-folding mirrors, headlamp washers and a new black Nappa leather interior option. Also new is the Trailhawk model that includes the Select-Terrain system, Quadra-Lift air suspension, Goodyear Silent Armor off-road tires and rock-rail body protection.

It's not much of a stretch to declare the 2013 Jeep Grand Cherokee the finest version ever to wear the storied nameplate. Designed during the reign of Mercedes-Benz over Chrysler, the 2013 Grand Cherokee enjoys the benefits of this short-lived marriage by borrowing parts of the M-Class platform. The result is a vehicle so rigid and tight that it makes older Grand Cherokees feel like centuries-old rickshaws. A stunning interior bolstered by cutting-edge infotainment and electronics systems awaits the lucky occupants while, underneath, Jeep's legendary 4-wheel-drive (4WD) systems prove the Grand Cherokee hasn't gone weak when it comes to its off-road capabilities. Along with the Laredo, Limited and Overland trims, there is a new Trailhawk model, as well as the performance-oriented, 4WD-only SRT8.

Style	Trade-In Value	Private Party Value	Fair Purchase Price
Overland Summit Sport Utility 4D	\$3,550	\$8,225	\$9,350
SRT8 Sport Utility 4D	\$16,050	\$17,000	\$19,050
SRT8 Alpine Sport Utility 4D	\$15,950	\$17,150	\$19,200
SRT8 Vapor Sport Utility 4D	\$17,250	\$18,350	\$20,500

Values above are based on "Good" condition vehicles ⓘ. Estimated Trade-In Values range from about \$2,400 to \$17,250 depending on vehicle style. Estimated Private Party Values range from about \$6,175 to \$18,350 depending on vehicle style. Values and prices are based on national averages and typical mileage for this model, but they can vary greatly according to mileage, condition, location, and other factors. Valid through 10/5/2026.

Trade-In Value

Trade-In Value is the amount you can expect to receive this week when trading in your vehicle at a dealership.

Private Party Value

Private Party Value is the fair price you can expect when selling your car to an individual, not to a dealer.

Fair Purchase Price

Fair Purchase Price shows what others in your area are actually paying for this vehicle.

2013 Jeep Grand Cherokee Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

M	Marginal	Basic
P	Poor	

Some ratings use a scale of Poor to Good. Others range from Basic to Superior.

Small overlap front: driver-side

Tested vehicle: **2014 Jeep Grand Cherokee Laredo E 4-door 4wd**

Rating applies to 2013-22 models built after January 2013

The Jeep Grand Cherokee was redesigned for the 2011 model year. Beginning with 2013 models built after January 2013, the seat belts and airbags were modified to improve occupant protection in small overlap frontal crashes. (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar.)

Driver restraints and dummy kinematics

The dummy's movement was reasonably well controlled. The dummy's head remained largely in contact with the frontal airbag, but its head still moved toward the intruding A-pillar because the seat belt allowed excessive forward excursion of the dummy's head and torso. The side curtain airbag deployed but does not have sufficient forward coverage to protect the head from contact with forward side structure and outside objects. The side torso airbag deployed.

A

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was not maintained well.

During the crash, the seat belt allowed the dummy to move too far forward, as is evident from the gap between the seat back and the dummy's torso. The side curtain airbag did not extend far enough forward toward the A-pillar.

Intrusion of the parking brake pedal, door hinge pillar, and instrument panel contributed to a significant risk of injury to the left lower leg.

► Technical measurements for this test

Small overlap front: passenger-side

Tested vehicle: **2018 Jeep Grand Cherokee Sterling 4-door 4wd**

Rating applies to 2013-21 models built after January 2013

The Jeep Grand Cherokee was redesigned for the 2011 model year. Beginning with 2013 models built after January 2013, the seat belts and airbags were modified to improve occupant protection in small overlap frontal crashes. Passenger restraints and dummy kinematics	
--	--

The dummy's head loaded the frontal airbag, which stayed in front of the dummy until rebound. However, the side curtain airbag did not deploy and the front passenger door opened during the crash, which shouldn't happen because the passenger could be partly or completely ejected from the vehicle. In fact during rebound, the dummy's head moved outside the vehicle, leaving the head vulnerable to contact with side structure and outside objects.

Action shot taken during the passenger-side small overlap frontal crash test.

The dummy's position in relation to the door frame and dashboard after the crash test indicates that the passenger's survival space was not maintained well.

The side curtain airbag did not deploy, uncommon for 2018 model year and later vehicles, and the dummy's head bottomed out the frontal airbag and hit the dashboard hard.

The passenger door opened during the crash test, and the dummy's head moved outside the vehicle during rebound.

Intrusion of the dashboard and door hinge pillar contributed to a likely risk of injury to the right lower leg.

► Technical measurements for this test

Moderate overlap front: original test

Tested vehicle: **2011 Jeep Grand Cherokee Laredo 4-door 4wd**

Rating applies to 2011-22 models

The Jeep Grand Cherokee was redesigned for the 2011 model year. Moderate overlap frontal ratings are assigned by the Institute based on a test conducted by Chrysler Corporation.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by [these auto insurers and insurance associations](#).
