# 2024 Kia Forte Review

By **Russ Heaps**
Updated January 30, 2025

## Pros

- Spacious cabin
- Value pricing
- Generous warranty

## Cons

- Sluggish base engine
- Unremarkable safety ratings

## What's New?

- Essentially unchanged

With tremendous appeal to the value-conscious, the Kia Forte is a well-equipped compact sedan that achieves enviable fuel economy. We believe its thriftiness is its most endearing quality. Relatively inexpensive to own with better-than-average resale value, the Forte is a bargain in its segment. A few rivals, like the Toyota Corolla and Honda Civic, have higher profiles; however, the Forte stands out as a deal. Undoubtedly, this is one of the reasons Forte is Kia's best-selling car.

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

# 2024 Kia Forte Safety

## Safety Features & Technology

2023 features shown. 2024 may differ.

**Drive Wise**

Under the collective term of Drive Wise, Kia's standard set of driver aids includes a forward collision warning with automatic emergency braking, lane-keeping assistance, and lane-following assistance, which helps the driver keep a safe space between the 2023 Forte and the vehicle in front while also identifying appropriate spaces in other lanes for better traffic flow in heavy congestion.

**Blind-spot monitoring with rear cross-traffic alert**

This becomes standard in the GT Line, warning drivers of any other vehicles on either side that would make changing lanes too dangerous. And rear cross-traffic alert looks out for vehicles while the 2023 Forte is being backed out of a parking space. Safe Exit Warning, alerting all occupants of potential hazards when preparing to open the car doors, is also standard in the GT Line.

**Navigation-based smart cruise control**

This system is standard in the GT with the automatic transmission. In addition to adaptive cruise control, the car uses its navigation system to know when the road starts to curve and will adjust its speed accordingly.

### Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

# Driver-side

Tested vehicle: **2019 Kia Forte S 4-door**
*Rating applies to 2019-24 models*

The Kia Forte was redesigned for the 2019 model year. Two driver-side small overlap frontal tests of the Forte were conducted, one by the Institute and the other by Hyundia/Kia. Ratings are based on both tests.

| Lower leg/foot | **G** |
| **Driver restraints and dummy kinematics** | **G** |

Action shot taken during the Institute's driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained very well (Institute test car shown).

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury (Institute test shown).

The driver's space was maintained well in both tests, and risk of injuries to the dummy's legs and feet was low.

## Passenger-side

Tested vehicle: **2019 Kia Forte EX 4-door**
*Rating applies to 2019-24 models*

The Kia Forte was redesigned for the 2019 model year.

Passenger-side small overlap frontal ratings are assigned by the Institute based on a test conducted by Hyundai/Kia.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head remained a safe distance from the front seatback.

Rear passenger dummy injury values indicate a likely risk of injury to the head or neck and a moderate risk of injury to the chest. During the crash, the shoulder belt remained in an ideal position on the dummy’s chest.

The rear passenger dummy's lap belt moved from the ideal position on the pelvis onto the abdomen, increasing the risk of abdominal injuries.

# Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
