About AutoCheck

AutoCheck vehicle history reports by Experian Automotive is the leading vehicle history reporting service. With expert data handling, the Experian Automotive database houses over 4 billion records on a half a billion vehicles. Every AutoCheck vehicle history report will give you confidence when buying or selling your next used vehicle, with superior customer service every step of the way.

Patent Notice

Certain aspects of this vehicle history report may be covered by U.S. Patent 8,005,759.

Here is a list of some major defects that may occur in used vehicles.

Frame & Body

Frame-cracks, corrective welds, or rusted through
Dog tracks—bent or twisted frame

Engine

Oil leakage, excluding normal seepage
Cracked block or head
Belts missing or inoperable
Knocks or misses related to camshaft lifters and push rods
Abnormal exhaust discharge

Transmission & Drive Shaft

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged case which is visible
Abnormal noise or vibration caused by faulty transmission or drive shaft
Improper shifting or functioning in any gear
Manual clutch slips or chatters

Differential

Improper fluid level or leakage, excluding normal seepage
Cracked or damaged housing which is visible
Abnormal noise or vibration caused by faulty differential

Cooling System

Leakage including radiator
Improperly functioning water pump

Electrical System

Battery leakage
Improperly functioning alternator, generator, battery, or starter

Fuel System

Visible leakage

Inoperable Accessories

Gauges or warning devices
Air conditioner
Heater & Defroster

Brake System

Failure warning light broken
Pedal not firm under pressure (DOT spec.)
Not enough pedal reserve (DOT spec.)
Does not stop vehicle in straight line (DOT spec.)
Hoses damaged
Drum or rotor too thin (Mfr. Specs)
Lining or pad thickness less than 1/32 inch
Power unit not operating or leaking
Structural or mechanical parts damaged

Air Bags

Steering System

Too much free play at steering wheel (DOT specs.)
Free play in linkage more than 1/4 inch
Steering gear binds or jams
Front wheels aligned improperly (DOT specs.)
Power unit belts cracked or slipping
Power unit fluid level improper

Suspension System

Ball joint seals damaged
Structural parts bent or damaged
Stabilizer bar disconnected
Spring broken
Shock absorber mounting loose
Rubber bushings damaged or missing
Radius rod damaged or missing
Shock absorber leaking or functioning improperly

Tires

Tread depth less than 2/32 inch
Sizes mismatched
Visible damage

Wheels

Visible cracks, damage or repairs
Mounting bolts loose or missing

Exhaust System

Leakage
Catalytic Converter

"Excellent" - 3% of all cars we value meet this criteria. This car looks new and is in excellent mechanical condition. It has never had paint or bodywork and has an interior and body free of wear and visible defects. The car is rust-free and does not need reconditioning. Its clean engine compartment is free of fluid leaks. It also has a clean title history, has complete and verifiable service records.

2025 Nissan Rogue Review

By Russ Heaps

Updated July 08, 2025

Pros

- Above-average mpg
- Safety tech galore
- Comfy front seats

Cons

- Power delivery not as refined as some others

What's New?

- Rock Creek version
- More tech

The 2025 Nissan Rogue is a comfortable, fuel-efficient compact SUV with plenty of technology. Pricing starts at \$29,980.

Compact SUVs aren't often singled out for their good looks, but we'd say the 2025 Nissan Rogue has better curb appeal than most. However, that's not why the Rogue is Nissan's best-selling model. It's also a well-balanced small SUV that delivers excellent fuel economy, loads of advanced safety technology, and comfortable furnishings.

We've spent hundreds of hours driving and evaluating this generation of compact SUVs, including the Nissan Rogue.

What's New for 2025

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component. If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2021 Nissan Rogue SV 4-door 4wd**
Rating applies to 2021-26 models

The Nissan Rogue was redesigned for the 2021 model year. Driver-side small overlap frontal ratings are assigned by the Institute based on a test of a 2021 Nissan Rogue conducted by Nissan.

Overall driver-side evaluation	G
Structure and safety cage	A
Driver injury measures	
Head/neck	G
Chest	G
Hip/thigh	G
Lower leg/foot	G
Driver restraints and dummy kinematics	G

► Technical measurements for this test

Passenger-side

Tested vehicle: **2022 Nissan Rogue S 4-door 4wd**
Rating applies to 2022-26 models built after April 2022

The Nissan Rogue was redesigned for the 2021 model year for vehicles built in the US. Beginning with 2021 Rogue models built in Japan after February 2021, changes to the passenger-side frontal airbag and front passenger safety belt were implemented to match US built vehicles, and to improve occupant protection in passenger-side small overlap crashes. Further changes to the passenger-side frontal airbag were made beginning with 2022 models built after April 2022. (Information about when a specific

vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar. Information about what country a vehicle was built in is available by decoding the VIN number, present at the base of the windshield on the driver side).

Three passenger-side small overlap tests were conducted by Nissan. Because there were no structural changes, the structure rating is based on this test and two other tests of Rogue models conducted by Nissan. Because there were no changes to the driver restraints, driver data is based on all three tests.

Overall passenger-side evaluation	G
Structure and safety cage	G
Passenger injury measures	
Head/neck	G
Chest	G
Hip/thigh	G
Lower leg/foot	G
Passenger restraints and dummy kinematics	G

 Technical measurements for this test

Moderate overlap front: updated test

Tested vehicle: 2025 Nissan Rogue S 4-door 4wd
Rating applies to 2025-26 models

The Nissan Rogue was redesigned for the 2021 model year.

Overall evaluation	A
Structure and safety cage	G

Driver injury measures

Head/neck	G
Chest	G
Thigh/hip	G
Leg/foot	G

Driver restraints and dummy kinematics

G

Rear passenger injury measures

Head/neck	A
Chest	A
Thigh	G

Rear passenger restraints and dummy kinematics

A

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head approached the front seatback, which increases the risk of head injuries.

Rear passenger dummy injury values indicate a moderate risk of injury to the head or neck and chest. During the crash, the shoulder belt remained in an ideal position on the dummy's chest.

The rear passenger dummy's lap belt remained in the ideal position on the pelvis.

► Technical measurements for this test

Side: updated test

Tested vehicle: **2021 Nissan Rogue SV 4-door 4wd**

Rating applies to 2021-25 models

The Nissan Rogue was redesigned for the 2021 model year.

Overall evaluation	A
Structure and safety cage	G
Driver injury measures	
Head/neck	G
Torso	G
Pelvis	G
Driver head protection	
The dummy's head moved downward past the side curtain airbag and struck the window sill of the driver door hard, while the head was in proximity to the intruding barrier. Although the barrier did not hit the dummy's head in this test, this near miss indicates that only slightly different crash circumstances could produce a direct hit to a person's head. The head protection is inadequate.	M
Rear passenger injury measures	
Head/neck	G
Torso	G
Pelvis	G
Rear passenger head protection	
The dummy's head contacted the C-pillar hard, through the side curtain airbag. The head protection is inadequate.	M

View of the vehicle just after the crash test.

View of the vehicle after the crash with doors removed, showing the side airbags and damage to the occupant compartment.

Smeared greasepaint shows that the driver dummy's head moved downward, past the side curtain airbag, and contacted the window sill.

The dummy's head contacted the C-pillar through the side curtain airbag.

Headlights

Trim level(s): All trims

Low-beam headlight type	LED reflector
High-beam headlight type	LED reflector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	G

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on both right curves and fair on both left curves.

The low beams never exceeded glare limits.

High beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the gradual right curve and fair on the sharp right and both left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway, on both left curves and on the sharp right curve.

Front crash prevention: vehicle-to-vehicle 2.0

System details

- standard AEB with Pedestrian Detection

Overall evaluation A

Rating applies to all 2025-26 models

Passenger car target

Test run	Speed reduction	Timely warning?
31 mph/target centered	Collision avoided	
31 mph/target off-center	Collision avoided	
37 mph/target centered	Collision avoided	
37 mph/target off-center	Collision avoided	
43 mph/target centered	Collision avoided	
43 mph/target off-center	25 mph	

Motorcycle target

Test run	Speed reduction	Timely warning?
31 mph/target centered	Collision avoided	
31 mph/target off-center	Collision avoided	
37 mph/target centered	34 mph	
37 mph/target off-center	32 mph	

43 mph/target centered

34 mph

43 mph/target off-center

28 mph

Semitrailer

Only warning is tested with the semitrailer.

Includes high-beam assist credit

Rating applies to all 2025-26 models

Crossing child — day

- In the 12 mph test, this vehicle avoided a collision.
- In the 25 mph test, this vehicle avoided a collision.

Crossing adult — night

- In the 12 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.
- In the 25 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.

Parallel adult — night

- In the 25 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.
- In the 37 mph test, this vehicle avoided a collision when using its high beams and a warning was issued 2.4 seconds before impact. When using its low beams, this vehicle avoided a collision and a warning was issued 1.8 seconds before impact.

Child seat anchors

Rating applies to 2021-26 models

Overall evaluation	G + extra LATCH positions
Vehicle trim	S
Seat type	cloth

This vehicle has 2 rear seating positions with complete child seat attachment (LATCH) hardware. It has 1 additional seating position with a tether anchor, a single lower anchor and the ability to borrow the second anchor from another position. Note: When anchors are borrowed, they aren't available to use in their designated positions.

Details by seating position

- 1

Tether anchor

easy-to-find location

no other hardware could be confused for anchor

Lower anchors

not too deep in seat

not too much force needed to attach

easy to maneuver around anchors

- 2

Tether anchor

easy-to-find location

no other hardware could be confused for anchor

Lower anchors

1 dedicated anchor and 1 that can be borrowed from seat 3

not too deep in seat

not too much force needed to attach

easy to maneuver around anchors

- G

Good
- A

Acceptable
- M

Marginal
- P

Poor
- ☐

Seating positions that rely on borrowed lower anchors or have only a tether anchor available are not rated.

Tether anchor

Lower anchors

Lower anchor(s) can be borrowed from adjacent positions(s)

☐ No hardware available

3 **Tether anchor**

- easy-to-find location
- no other hardware could be confused for anchor

Lower anchors

- not too deep in seat
- not too much force needed to attach
- easy to maneuver around anchors

Learn about the initiative

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by [these auto insurers and insurance associations](#).
