2020 Kia Sportage Review

By **Andy Bornhop** ⓘ

Updated September 21, 2020

Pros

The 2020 Kia Sportage is a capable and reasonably priced compact-crossover SUV with updated looks, a choice of engines and a good selection of high-tech features. Four fit comfortably inside this compact Kia compact SUV, and there's plenty of space in back for all your luggage.

Cons

A Honda CR-V and a Subaru Forester are roomier than the Sportage, and they both have an assortment of standard driver assists that are available only as options on the Kia. Folks looking for some off-road ability are better served by the Jeep Compass and Subaru Crosstrek.

What's New?

For 2020, the Kia Sportage gets revised styling, a standard 8-inch touch screen and more available driver-assist features. LED headlights are available, as are a smartphone-charging tray, Leatherette interior trim and a new Steel Grey exterior color. Driver assists include lane-keep assist, a driver-attention warning, smart cruise control, emergency braking (with pedestrian protection) and high-beam assist.

#5 in [Best Compact SUVs of 2020](#)

The Kia Sportage has been significantly refreshed for 2020, now sporting updated front and rear styling, more driver-assist features and a new S level of trim. The new 2020 Kia Sportage also is enhanced inside, where there's a new steering wheel, a standard 8-inch touch screen (with Apple CarPlay and Android Auto compatibility) and available Leatherette seating surfaces.

As before, the Sportage continues to attract buyers with its attractive pricing, fantastic 10-year/100,000-mile powertrain warranty and generous amount of standard and available equipment. Kia's [compact SUV](#) is available with two engines: a 2.4-liter 4-cylinder with 181

Some ratings use a scale of Poor to Good. Others range from Basic to Superior.

Small overlap front: driver-side

Tested vehicle: **2016 Hyundai Tucson SE 4-door 4wd**
Rating applies to 2017-22 models

The Hyundai Tucson was redesigned for the 2016 model year, and the Kia Sportage was redesigned for the 2017 model year (the two vehicles are now built on the same platform).

Driver restraints and dummy kinematics G

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

The driver's space was maintained well, and risk of injuries to the dummy's legs and feet was low.

Action shot taken during the passenger-side small overlap frontal crash test.

The dummy's position in relation to the door frame and dashboard after the crash test indicates that the passenger's survival space was maintained reasonably well.

The frontal and side curtain airbags worked well together to keep the passenger dummy's head from coming close to any stiff structure or outside objects that could cause injury.

Despite lateral intrusion of the door sill, the risk of injuries to the dummy's legs and feet was low.

Overall rating**A****Distance at which headlights provide at least 5 lux illumination:**

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the gradual left and gradual right curves and fair on the sharp left and sharp right curves.

The low beams created some glare.

High beams

On the straightaway, visibility was fair on both sides of the road. On curves, visibility was fair on the gradual left and gradual right curves and inadequate on the sharp left and sharp right curves.

Curve-adaptive? No

High-beam assist? Yes

Overall rating **P**

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was inadequate in all 4 tests.

The low beams created excessive glare.

High beams

On the straightaway, visibility was inadequate on both sides of the road. On curves, visibility was inadequate in all 4 tests.

High-beam assist compensates for some limitations of this vehicle's low beams on both left curves and on both right curves.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by [these auto insurers and insurance associations](#).
