2024 Nissan Altima Review

By **Russ Heaps**
Updated January 30, 2025

Pros

- Roomy cabin
- Advanced safety tech
- Available all-wheel drive

Cons

- Lackluster acceleration
- No hybrid

What's New?

- Basically unchanged

We've thought long and hard about what we don't like about the Altima. Other than its less-than-enthusiastic acceleration, we are hard-pressed to come up with any sort of list. On the other hand, even the pokey acceleration is offset by impressive fuel economy. So, this Nissan presents solid bang for your buck in the hotly contested midsize sedan arena, where the Altima faces off against the likes of the Honda Accord, Toyota Camry, and Subaru Legacy.

2024 Nissan Altima Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

2024 Nissan Altima Safety

Safety Features & Technology

2023 features shown. 2024 may differ.

Rear automatic braking

Standard in every new Altima sedan, this system works in conjunction with the rear parking sensors. If you put the car in reverse too close to an obstacle or hazard, it will apply the brakes to avoid an impact.

Intelligent Lane Intervention

Using a forward-facing camera to read road markings, this system will alert the driver if the 2023 Altima is about to veer into another lane and can brake the wheels along one side to pull it back into the center if necessary. This is optional in the SV, standard in the SL.

ProPilot Assist

Also optional in the SV and standard in the SL, ProPilot Assist is full-speed adaptive cruise control with steering assistance to maintain lane discipline.

Moderate overlap front: updated test

Tested vehicle: **2024 Nissan Altima 2.5 S 4-door**

Rating applies to 2024-26 models

The Nissan Altima was redesigned for the 2019 model year. Beginning with 2024 models, improvements were made to the rear seatbelts to improve occupant safety for rear passengers in moderate overlap front crashes.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head remained a safe distance from the front seatback.

Rear passenger dummy injury values indicate a low risk of injury to the head or neck and chest but during the crash, the shoulder belt moved too far upward toward the dummy’s neck, compromising the effectiveness of the rear restraint system.

The rear passenger dummy's lap belt moved from the ideal position on the pelvis onto the abdomen, increasing the risk of abdominal injuries.

Side: updated test

Tested vehicle: **2022 Nissan Altima 2.5 S 4-door**

Rating applies to 2022-26 models

The Nissan Altima was redesigned for the 2019 model year. Beginning with 2022 models, side curtain airbags were enlarged and door sill and pillar reinforcements were implemented to improve occupant protection in side impact crashes. Two side impact 2.0 tests were conducted because rear dummy injury data was not recorded in the first test. Rear passenger injury measures are from the second test. Driver injury measures and structure ratings are based on both tests.

Smeared greasepaint shows that the driver dummy's head moved downward, past the side curtain airbag, and contacted the window sill.

Smeared greasepaint shown is on the upper/outboard seatback. The rear passenger dummy's head was protected by the side airbags.

Low-beam headlight type	LED projector
High-beam headlight type	LED projector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	**A**

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on the right side of the road and fair on the left side. On curves, visibility was fair on the sharp left and both right curves and inadequate on the gradual left curve.

The low beams never exceeded glare limits.

High beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was fair on the gradual left curve and

inadequate on the sharp left and both right curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway and on both left curves.

Crossing child — day

- In the 12 mph test, this vehicle avoided a collision.
- In the 25 mph test, impact speed was reduced by 11 mph.

Crossing adult — night

- In the 12 mph test, impact speed was reduced by 5 mph when using its high beams. When using its low beams, impact speed was reduced by 1 mph.

- In the 25 mph test, impact speed was reduced by 7 mph when using its high beams. When using its low beams, impact speed was reduced by 5 mph.

Parallel adult — night

- In the 25 mph test, impact speed was reduced by 11 mph when using its high beams. When using its low beams, impact speed was reduced by 5 mph.
- In the 37 mph test, impact speed was reduced by 9 mph when using its high beams and a warning was issued 1.3 seconds before impact. When using its low beams, this vehicle failed to slow and a warning was issued 0 seconds before impact.

This vehicle has 2 rear seating positions with complete child seat attachment (LATCH) hardware. It has 1 additional seating position with a tether anchor and the ability to borrow lower anchors from the other seating positions. Note: When anchors are borrowed, they aren't available to use in their designated positions.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through

research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
