2026 Chevrolet Equinox Review

By **Matt Degen** ⓘ

Updated June 18, 2025

Pros

- Technology
- Standard features

Cons

- Lack of powertrain choice
- Lack of trim choice
- Middling power

What's New?

- Exterior paint color
- Base model gets drive mode dial

The 2026 Chevrolet Equinox is a competent and contemporary compact SUV with bold looks and great technology. Pricing starts at $30,795.

In a sea of excellent competitors, the Chevrolet Equinox swims midpack with other small SUVs and even brings a few flashes of greatness. The Equinox was totally redesigned just last year,

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2025 Chevrolet Equinox LT 4-door 2-wheel drive**
Rating applies to 2025-27 models

The Chevrolet Equinox and GMC Terrain were redesigned for the 2025 model year. Driver-side small overlap front ratings are assigned by the Institute based on a test of a 2025 Equinox conducted by General Motors.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head remained a safe distance from the front seatback.

Rear passenger dummy injury values indicate a low risk of injury to the head or neck and chest. During the crash, the shoulder belt moved too far upward toward the dummy’s neck, compromising the effectiveness of the rear restraint system.

The rear passenger dummy's lap belt remained in the ideal position on the pelvis.

Headlights

Trim level(s): All trims

Low-beam headlight type	LED projector
High-beam headlight type	LED projector

Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	**G**

Distance at which headlights provide at least 5 lux illumination:

Low beams
On the straightaway, visibility was good on the left side of the road and fair on the right side. On curves, visibility was good on the sharp left and both right curves and fair on the gradual left curve.

The low beams created some glare.

High beams
On the straightaway, visibility was good on the right side of the road and fair on the left side. On curves, visibility was good on the gradual left and gradual right curves and fair on the sharp right and sharp left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway, on both left curves and on the sharp right curve.

Crossing child — day

- In the 12 mph test, this vehicle avoided a collision.
- In the 25 mph test, impact speed was reduced by 22 mph.

Crossing adult — night

- In the 12 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.
- In the 25 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.

Parallel adult — night

- In the 25 mph test, this vehicle avoided a collision when using its high beams. When using its low beams, this vehicle avoided a collision.
- In the 37 mph test, impact speed was reduced by 23 mph when using its high beams and a warning was issued 2.4 seconds before impact. When using its low beams, impact speed was reduced by 22 mph and a warning was issued 1.3 seconds before impact.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
