2024 Nissan Pathfinder Review

By **Russ Heaps** ⓘ
Updated January 30, 2025

Pros

- Rugged good looks
- Best-in-class towing
- Top safety ratings

Cons

- So-so resale value
- Third-row legroom

What's New?

- Essentially unchanged

Engineered around family comfort and safety, the Nissan Pathfinder mixes rugged good looks with an available sophisticated 4-wheel-drive (all-wheel-drive) system to provide a sense of go-anywhere adventure. In fact, its Rock Creek trim level further cranks up the Pathfinder's off-road character. When appropriately equipped, it delivers a segment-leading 6,000 pounds of towing capacity. However, it's the well-appointed cabin, family-oriented features, and impressive technologies that attract buyers year after year.

2024 Nissan Pathfinder Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

2024 Nissan Pathfinder Safety

Safety Features & Technology

2023 features shown. 2024 may differ.

Nissan Safety Shield 360

All 2022 Nissan Pathfinders are equipped with this safety suite, which includes automatic emergency braking (with pedestrian detection), blind-spot monitoring, rear cross-traffic alert, lane-departure warning, and rear automatic braking.

ProPilot Assist

ProPilot Assist is a semi-autonomous driving system that combines full-speed adaptive cruise control with steering assist to make highway driving nearly effortless. This takes some fatigue out of highway driving, but you still need to keep your hands on the steering wheel and eyes on the road.

Navi-link

Navi-link enhances the ProPilot Assist system by incorporating navigation map data. It can automatically adjust your speed when the speed limit changes and when it predicts sharp curves in the road.

Moderate overlap front: updated test

Tested vehicle: **2024 Nissan Pathfinder SL4-door 4wd**

Rating applies to 2024-26 models built after November 2023

The Nissan Pathfinder was redesigned for the 2022 model year after a one-year absence from the market. Beginning with 2024 models, built after November 2023, improvements were made to the rear seat belts to improve rear occupant protection in moderate overlap front crashes. (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar.) These ratings do not apply to the Infiniti QX60.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head approached the front seatback, which increases the risk of head injuries.

Rear passenger dummy injury values indicate a low risk of injury to the head or neck and chest. During the crash, the shoulder belt remained in an ideal position on the dummy’s chest.

The rear passenger dummy's lap belt remained in the ideal position on the pelvis.

Headlights

Trim level(s): All trims

Low-beam headlight type	LED reflector

High-beam headlight type	LED reflector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	**A**

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on the right side of the road and fair on the left side. On curves, visibility was fair on the sharp left and both right curves and inadequate on the gradual left curve.

The low beams never exceeded glare limits.

High beams

On the straightaway, visibility was fair on both sides of the road. On curves, visibility was good on the gradual right curve and fair on the sharp right and both left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway and all 4 curves.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
