2017 Kia Soul Review

By **Rob Nestora**
Updated July 31, 2022

Pros

The 2017 Kia Soul is a compelling choice for anybody searching for a nifty-looking, fun-driving and feature-filled affordable compact car. It looks like nothing else on the road, can't help but put out a fun vibe, and is quite practical thanks to a roomy interior.

Cons

If you think a boxy-looking vehicle should have all-wheel drive, the Soul's front-drive layout will have you pointed toward the Jeep Renegade or Subaru XV Crosstrek. While the Soul Exclaim packs new muscle, the Honda Civic and Mazda3 and are more fun to drive. The Kia Soul EV, meanwhile, just got upstaged by the new Chevy Bolt.

What's New?

The 2017 Kia Soul wagon gets a host of upgrades in addition to the Soul Exclaim's new turbo engine. Other updates include available Apple CarPlay and Android Auto, an 8-way-power passenger seat, blind-spot monitoring, additional USB ports, HID headlights, and a new full-color information display between the gauges for the Exclaim.

The 2017 Kia Soul finally receives the one thing it's lacked since the first hamster-driven 5-door hatchback appeared on our streets: horsepower. The top-level 2017 Soul Exclaim now boasts a 201-horsepower turbocharged 4-cylinder that delivers the verve the Kia Soul's funky styling and marketing long promised. Beyond the Turbo model's extra power, the entire lineup now offers Apple CarPlay and Android Auto, blind-spot detection, additional USB inputs and more. The all-electric Soul EV touts gas-free driving, but its range is only 93 miles, and availability is limited. The 2017 Soul is a compelling alternative not just to subcompact SUVs like the Fiat 500X or Mini Cooper Countryman, but

2017 Kia Soul Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained reasonably well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

The driver's space was maintained reasonably well, and risk of injuries to the dummy's legs and feet was low.

Small overlap front: passenger-side

Tested vehicle: **2018 Kia Soul wagon**

Rating applies to 2015-19 models

The Kia Soul was redesigned for the 2014 model year. Beginning with 2015 models, the front-end and occupant compartment structure was strengthened to improve occupant protection in small overlap frontal crashes.

Two passenger-side small overlap frontal tests of the Soul were conducted, one by the Institute of a 2018 model and the other by Hyundai/Kia of a 2017 model. Ratings are based on both tests.

Hip/thigh	**G**
Lower leg/foot	**G**
Passenger restraints and dummy kinematics In both tests, the dummy’s head contacted the frontal airbag but then moved off toward the right side. In the Institute's test, the head moved so far forward and to the right that it hit the dashboard. The side curtain airbag deployed and has sufficient forward coverage in both tests to protect the head from contact with side structure and outside objects. The side torso airbag also deployed.	**M**

Action shot taken during the Institute's passenger-side small overlap frontal crash test.

The dummy's position in relation to the door frame and dashboard after the crash test indicates that the passenger's survival space was maintained well (Institute test car shown).

The dummy’s head slid off the right side of the frontal airbag and moved far enough forward to hit the dashboard hard (Institute test shown).

The passenger's space was maintained well in both tests, but forces on the right lower leg were just high enough to indicate the possibility of injuries in the test conducted by Hyundai/Kia. In the test conducted by the Institute (pictured), injury risk to both legs and feet was low.
