# 2023 Ford Escape Review

By **Eric Brandt**
Updated January 30, 2025

## Pros

- Modern tech features
- Roomy, flexible interior
- Multiple hybrid options

## Cons

- So-so base engine

## What's New?

- Revised styling
- New trim structure
- Updated tech

The Ford Escape improves its value proposition in the compact SUV class with a thorough refresh for the 2023 model year. It continues with the same four engine options (two of which are hybrids) but gets a pretty significant aesthetic facelift and desirable new tech like standard wireless smartphone connectivity. It competes in a crowded segment led by the likes of the Toyota RAV4, Honda CR-V, Hyundai Tucson, and Chevrolet Equinox.

## 2023 Ford Escape Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

# 2023 Ford Escape Safety

## Safety Features & Technology

**Co-Pilot360**

Ford's set of standard driver aids that come in every new Escape includes forward collision warning with automatic emergency braking and pedestrian detection, blind-spot monitoring with cross-traffic alert, lane-keeping assistance, and automatic high beams.

**Co-Pilot360 Assist+**

This optional supplemental bundle of features includes adaptive cruise control with stop/go and a lane-centering function, plus evasive steering assistance.

**Speed Sign Recognition**

This is also included in the Assist+ collection. Imagine using the adaptive cruise control on the freeway set at (let's be law-abiding) 65 mph. If there's a temporary construction zone where the posted limit drops to 55 mph, this feature recognizes the sign and slows the Escape accordingly. Clear of the zone, the preset speed is resumed. There's also some wiggle room — the driver can set the speed a few mph above the number on any signs, and the system will comply.

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained very well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

The driver's space was maintained well, and risk of injuries to the dummy's legs and feet was low.

Tested vehicle: **2022 Ford Escape SE 4-door 4wd**
*Rating applies to 2022-26 models built after May 2022*

The Ford Escape was redesigned for the 2020 model year. Beginning with 2022 Escape models built after May 2022, improvements were made to the rear seatbelt to improve rear occupant protection in moderate overlap front crashes (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the driver door or adjacent B-pillar).

# Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
