2017 Mitsubishi Outlander Sport Review

By **Keith Buglewicz**
Updated November 25, 2019

Pros
If you're looking for a compact SUV that stands out from the crowd, yet won't cost an arm and a leg when you start adding options, check out the 2017 Mitsubishi Outlander Sport. The standard 10-year/100,000-mile powertrain warranty is another great reason to buy.

Cons
Mitsubishi's limited dealer network may be an issue for some, while others may find more power in the Subaru Forester XT, better resale in the Honda CR-V and better off-road performance from the Jeep Renegade.

What's New?
For 2017 the Mitsubishi Outlander Sport compact-crossover SUV gains automatic climate control, a shark-fin antenna and new upgraded cloth seating material on the ES trim.

In a deep sea of Honda CR-Vs, Toyota RAV4s and Subaru Foresters, the 2017 Mitsubishi Outlander Sport compact SUV is often overlooked and overshadowed. That's unfortunate because the Outlander Sport is one efficient, well-equipped and affordable compact-crossover SUV. Base models still offer a manual transmission, and the upper trims come nicely equipped with features like a Rockford Fosgate audio system, leather seating and an advanced all-wheel-drive option. Two 4-cylinder engine choices provide decent power and good fuel economy, and the Outlander Sport's interior accommodations are right in line with the Ford Escape and Nissan Juke. However, unlike many of its competitors, the Outlander Sport does not have advanced driver assists like autonomous braking, lane-departure warning and adaptive cruise control.

2017 Mitsubishi Outlander Sport Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a

guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
This vehicle has an incomplete rating because it has been tested only on one side.

Driver-side

Tested vehicle: **2012 Mitsubishi Outlander Sport SE 4-door 4wd**

Rating applies to 2011-27 models

The Mitsubishi Outlander Sport was introduced in the 2011 model year.

Driver restraints and dummy kinematics

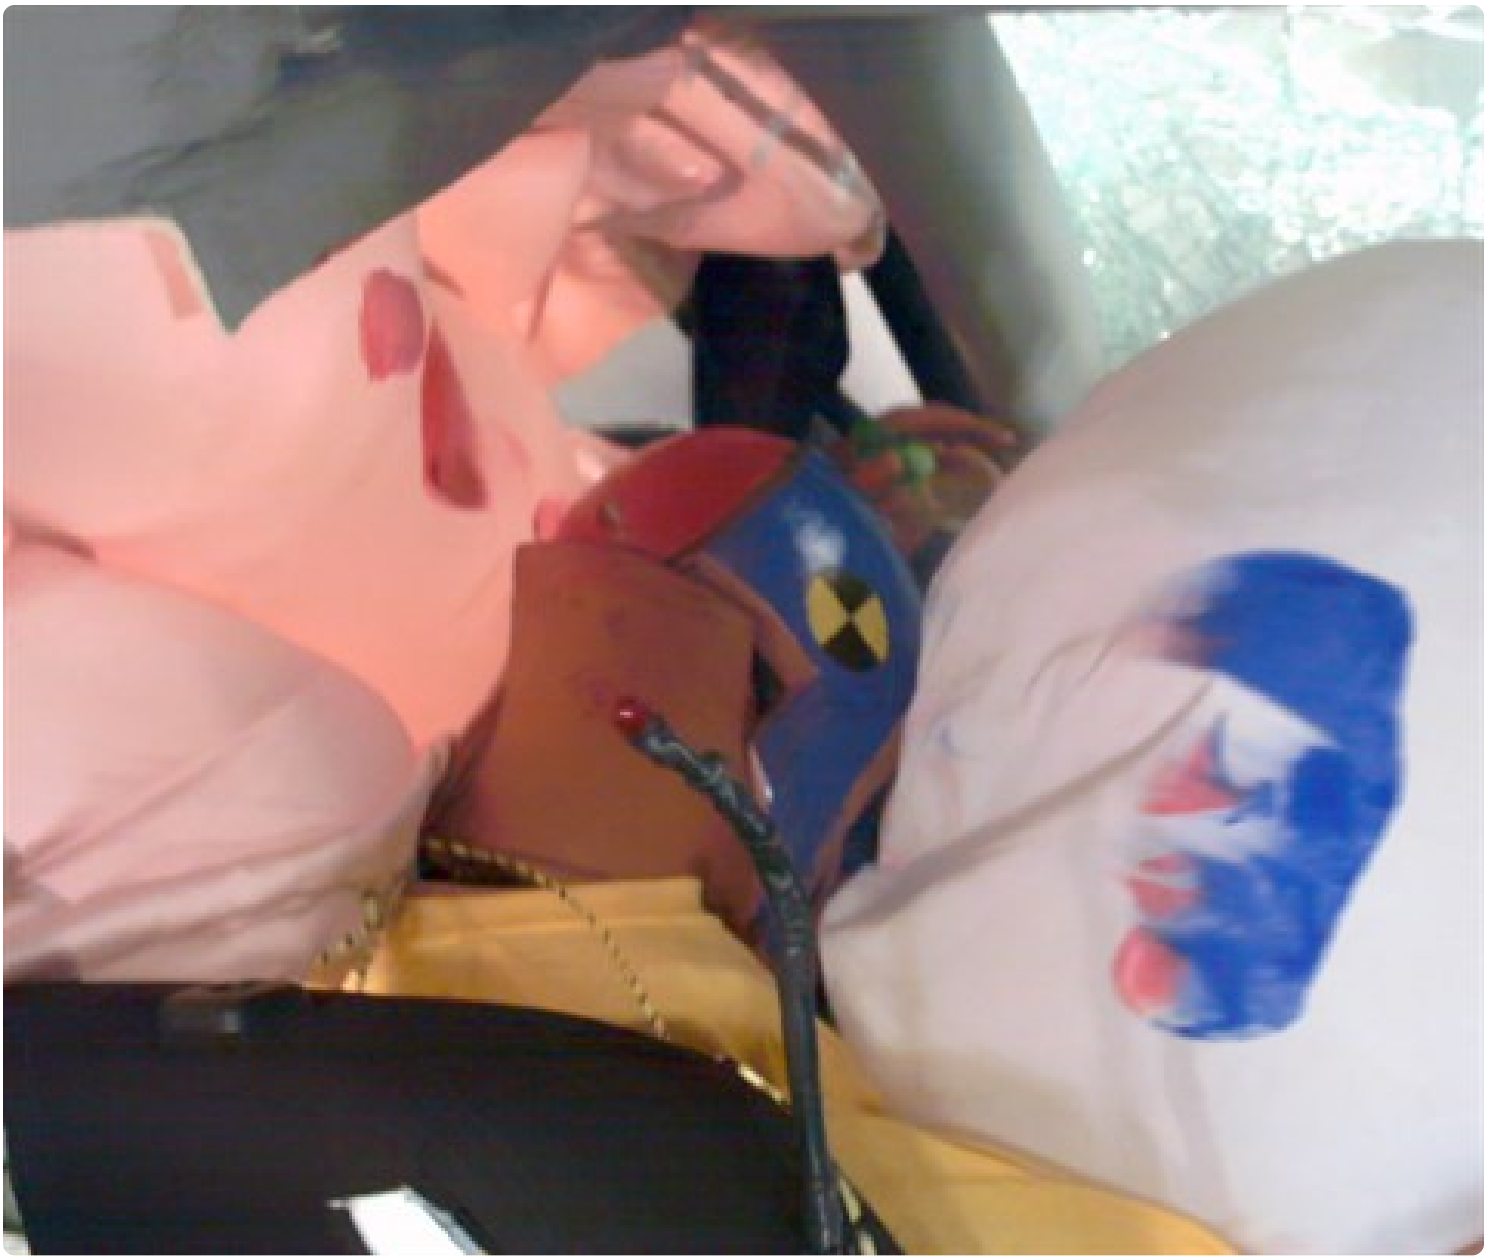

The dummy's head contacted the frontal airbag but slid off the left side, leaving the head vulnerable to contact with forward side structure. The side curtain airbag deployed but does not have sufficient forward coverage to protect the head from contact with forward side structure and outside objects. The side torso airbag also deployed.	**A**

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained reasonably well.

The dummy’s head contacted the frontal airbag but then slid off the left side. The side curtain airbag did not extend quite far enough forward toward the A-pillar to protect the head from contact with forward side structure.

Except for door hinge pillar deformation, intrusion into the driver's space was reasonably well controlled, and risk of injuries to the dummy's legs and feet was low.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
