2024 Chevrolet Blazer Review

By **Russ Heaps** ⓘ

Updated January 30, 2025

Pros

- Aggressive styling, V6 option, intuitive infotainment system

Cons

- Budget cabin materials, sub-par cargo room

What's New?

- Heated front seats standard

According to our readers' comments, the Blazer is a roomy, sporty, good-looking 5-person midsize SUV. We couldn't agree more. We add that its infotainment system, with its 10.2-inch touchscreen, is one of the industry's easiest to use. Although the current generation is now six years old, its styling and performance still excite. It has rivals, like the [Ford Edge](#) and [Honda Passport](#), with more cargo room, but folks in both rows of seating swim in elbow and legroom. The midsize SUV segment is hotly contested; yet, the 2024 Chevy Blazer manages to still be noticed, admired, and relevant.

2024 Chevrolet Blazer Safety

Safety Features & Technology

2023 features shown. 2024 may differ.

Chevy Safety Assist

It isn't disrespectful to shorten the Chevrolet name to Chevy. This is exactly how the company refers to its array of standard driver assistance features that are in every new Blazer. This includes forward collision warning with automatic emergency braking and pedestrian detection, lane-keeping assistance, and automatic high beams.

Lane Change Alert with Side Blind Zone Alert

Also known as blind-spot monitoring. This feature becomes standard at the 3LT level, optional in the 2LT. It warns drivers of vehicles in adjacent lanes. Rear cross-traffic alert is also included, which comes into its own when reversing the Blazer SUV out of a parking space.

Driver Confidence II package

Sadly, this is only optional with the top two trims of the 2023 Blazer SUV. It includes adaptive cruise control, rear camera mirror, 360-degree camera system, and a Safety Alert Seat which warns drivers of potential hazards in the most fundamental way.

Some ratings use a scale of Poor to Good. Others range from Basic to Superior.

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.

If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2020 Chevrolet Blazer 4-door 4wd**

Rating applies to 2019-26 models

The Chevrolet Blazer was reintroduced in the 2019 model year.

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained very well.

The driver's space was maintained well, and risk of injuries to the dummy's legs and feet was very low.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.
