2023 Hyundai Santa Fe Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

2023 Hyundai Santa Fe Safety

Safety Features & Technology

Forward collision warning

Every new Santa Fe SUV comes with this safety feature, which also includes automatic emergency braking, pedestrian/cyclist detection, and junction turning assistance.

Blind-spot monitoring

Warning drivers of vehicles in adjacent lanes, blind-spot monitoring is another standard safety system across the 2023 Santa Fe lineup. It's enhanced with rear cross-traffic alert and automatic emergency braking when reversing. The Safe Exit Assist feature, which alerts all occupants about to leave the vehicle of any hazards that might be approaching.

Blind-Spot View Monitor

This is an option, but it's relatively accessible as part of the Premium package for the one-up-from-base SEL trim. Cameras at each side can show more than the mirrors can, and their images are seen in the driver information display that's also part of this package.

Headlights

Ratings are given for 2 different headlight variations available on this vehicle.

(1) Trim level(s): Limited trim, Calligraphy trim, Hybrid Limited trim

Low-beam headlight typeLED projector

High-beam headlight typeLED projector

Curve-adaptive?No

High-beam assist?Yes

Overall ratingG

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good in all 4 tests.

The low beams created some glare.

High beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the gradual left and gradual right curves and fair on the sharp right and sharp left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway, on the sharp left curve and on the sharp right curve.

Learn about the initiative

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.
