2021 Ram 1500 Crew Cab Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

2021 Ram 1500 Crew Cab Safety

Safety Features & Technology

Six Standard Airbags

All 2021 Ram 1500 pickups have six standard airbags, providing frontal- and side-impact occupant protection. The front airbags have adaptive damping, which means they automatically adjust for the size of the person and the severity of the crash.

Full-Speed Collision Warning Plus

In the case that the onboard camera and radar sense a frontal impact, this system pre-charges the brakes and provides audible and visual warnings to the driver. If the driver doesn't react, the Ram 1500 briefly taps its brakes to warn the driver. If no response, the brakes are applied automatically to bring the pickup to a stop. Standard on Laramie, Rebel, Longhorn, Limited Longhorn, and Limited. Available on Tradesman and Bighorn.

Advanced Safety Group

Optional on the Laramie and Limited, this is a thorough safety package. In addition to adaptive cruise control (with stop, go, and hold) and blind-spot monitoring (with trailer coverage and rear cross-path detection), the Advanced Safety Group includes a head-up display, a lane-departure warning, a surround-view camera,

automatic high-beam headlights, and a system that facilitates parallel and perpendicular parking.

Small overlap front: driver-side

Tested vehicle: **2019 Ram 1500 Big Horn Crew Cab 2wd**
Rating applies to 2019-24 models built after July 2018

The Ram 1500 Crew Cab was redesigned for the 2019 model year. The earlier design remained in production for the 2019-20 model years and was called the Ram 1500 Classic Crew Cab. The ratings on this page do not apply to the Classic.

For the redesigned pickup beginning with 2019 models built after July 2018, the cab mounts to the vehicle frame at the C-pillars were strengthened to improve occupant protection in small overlap frontal crashes. (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar.)

Two tests of the Ram 1500 Crew Cab were conducted by the Institute; vehicle specifications for the two trucks were identical. In the first test, Fiat Chrysler identified possible prior dummy ankle damage that may have caused elevated injury measures on the left lower leg. In the second test with a new ankle assembly installed, there were also indications of elevated left lower leg injury. Therefore, the ratings are based on combined results from both tests.

Action shot taken during the second of two driver-side small overlap frontal crash tests.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained well (second test shown).

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury (second test shown).

Forces on the left lower leg were high enough to indicate a likely risk of injury in the first test (shown) and a moderate risk in the second test.

Action shot taken during the passenger-side small overlap frontal crash test.

The dummy's position in relation to the door frame and dashboard after the crash test indicates that the passenger’s survival space was maintained reasonably well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

Despite intrusion of the toepan and dashboard, risk of injuries to the dummy's legs and feet was low.
