2024 Toyota Tacoma Double Cab Review

By **Colin Ryan** ⓘ
Updated June 16, 2025

Pros

- Refinement
- Capabilities
- Hybrid drivetrain available

Cons

- Top off-road models are pricey

What's New?

- The Tacoma is entirely new this year

Buyers have made previous generations of the Tacoma (and other Toyota pickups) huge successes because they're tough and dependable (the trucks, not the buyers, well, maybe the buyers, too). They'll stand up to a ton of punishment and then get you home — time after time. So we're going to assume Toyota has done its homework and decided that it's OK for its new Tacoma truck not to have class-leading towing or payload figures. The Tacoma is purchased and appreciated for other reasons — remarkable off-road talents and strong resale values being two more. This fourth-generation Tacoma sees upgrades in engines, suspensions, technology, and safety equipment. It also pulls away from its rivals with an available hybrid drivetrain. As we all know, hybrids are a Toyota specialty. This setup makes the new Tacoma one of the most powerful midsize trucks, with 326 horsepower and 465 lb-ft of torque.

2024 Toyota Tacoma Double Cab Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2022 Toyota Tundra SR5 CrewMax 4wd**
Rating applies to 2022-26 models

The Toyota Tundra Crew Cab was redesigned for the 2022 model year.

Action shot taken during the driver-side small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was maintained very well.

The frontal and side curtain airbags worked well together to keep the head from coming close to any stiff structure or outside objects that could cause injury.

The driver's space was maintained well, and risk of injuries to the dummy's legs and feet was low.

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head remained a safe distance from the front seatback.

Rear passenger dummy injury values indicate a moderate risk of injury to the head or neck and chest. During the crash, the shoulder belt moved too far upward toward the dummy’s neck, compromising the effectiveness of the rear restraint system.

The rear passenger dummy's lap belt moved from the ideal position on the pelvis onto the abdomen, increasing the risk of abdominal injuries.
