2019 Chevrolet Colorado Extended Cab Review

By **Paul A. Eisenstein**
Updated December 02, 2019

Pros
The 2019 Colorado is a solid alternative for anyone who doesn't need to go to extremes when it comes to cargo and towing — at a max 7,700 pounds, it will still haul a hefty trailer or boat. It's more fuel-efficient and easier to maneuver and park than a full-size truck.

Cons
There are still plenty of folks who want a full-size truck, especially if they'll need to tow more than 7,700 pounds. And the Colorado's interior isn't quite as roomy as a full-size model like the Chevy Silverado, either.

What's New?
The Chevy Colorado helped mark the bow-tie brand's 100th anniversary in 2018, so this year's truck sees more modest updates, including the addition of some new exterior color and wheel options, as well as upgrades to its infotainment system. There are new power seats on upper-trim levels, and a new Rear Park Assist system.

Few recent vehicles have done more to change the market than the Chevrolet Colorado, which proved there's real life left in the midsize-pickup segment. For many buyers, the Colorado offers all the interior space and cargo and towing capacity they need, while adding plenty of great features, good performance and handling and a reasonable price tag. Chevy has broadened the Colorado's appeal by adding new variants, including both a diesel model and the rugged, off-road-oriented ZR2. The 2019 Colorado gets a number of small but welcome updates to enhance its appeal.

2019 Chevrolet Colorado Extended Cab Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

Tested vehicle: **2017 Chevrolet Colorado Z71 Extended Cab 2wd**
Rating applies to 2017-22 models

The Chevrolet Colorado and GMC Canyon Extended Cab were redesigned for the 2015 model year after a two-year absence from the market. Beginning with the 2017 model year, the A-pillar, door lower hinge pillar, and door sill were reinforced to improve occupant protection in small overlap frontal crashes. Driver-side small overlap ratings are assigned by the Institute based on a test conducted by General Motors.

Driver restraints and dummy kinematics — **A**

The dummy's face remained in contact with the frontal airbag, but its head still rolled around the left side because the seat belt allowed excessive forward excursion of the head and torso. The side curtain airbag deployed and has sufficient forward coverage to protect the head from contact with side structure and outside objects.
