# 2019 Dodge Journey Review

By **Rob Nestora** ⓘ

Updated July 31, 2022

## Pros

...low-cost, multi-person transport is the name of the game and forget about the frills. The 2019 Journey has comfortable seats, a forgiving ride quality, and many stowage areas to help keep trips bearable.

## Cons

...you realize that initial outlay isn't the only important figure. For a longer warranty, check out the Kia Sorento. For driver-assistance features, look at the Honda Pilot and Toyota Highlander. For better 3rd-row space, inspect the Chevrolet Traverse. Each of these alternatives also enjoys superior resale values and reliability ratings.

## What's New?

Trim levels are reduced to three: SE, Crossroad and GT. Standard equipment is redistributed, with the SE gaining more, such as fog lights, tri-zone climate control, heated/power-folding side mirrors and (in the all-wheel-drive version) LED rear lights. And 2019 pricing starts lower than 2018 by about \$2,000.

The 2019 Dodge Journey is a 7-seater SUV/crossover SUV that's much less expensive than the usual rivals. In its lowest SE trim with a 4-cylinder engine, it undercuts the Ford Flex, Hyundai Santa Fe and Kia Sorento by thousands of dollars. Admittedly, this engine is far from a hot-rod's dream, but such overall keen pricing might tempt a potential buyer to splash out on the 283-horsepower V6 and a few other useful extras like all-wheel drive, heated steering wheel, and the well-regarded Uconnect infotainment system that brings an 8.4-inch touch screen. Before going

2019 Dodge Journey Depreciation

Annual Depreciation is an estimation of what your vehicle's value might be over time based on an average of similar vehicles. Estimations are calculated by comparing Kelley Blue Book Private Party Values of vehicles similar to yours over time, as well as forecasts from Manheim Auction data comparing current and projected auction values against current Kelley Blue Book Private Party and Trade-In Values. This is not a guarantee of actual depreciation. Local weather conditions, market factors and driver performance will also impact your vehicle's actual depreciation.

**Driver restraints and dummy kinematics**

The dummy's head barely contacted the frontal airbag before sliding off the left side as the steering column moved 14 cm to the right. The side curtain airbag did not deploy, leaving the dummy's head vulnerable to contacts with side structure and outside objects.

**M**

Action shot taken during the small overlap frontal crash test.

The dummy's position in relation to the door frame, steering wheel, and instrument panel after the crash test indicates that the driver's survival space was not maintained well.

During the crash, the dummy's head and torso barely contacted the airbag before sliding off to the left as the steering column moved to the right. The side curtain airbag did not deploy.

Door hinge pillar and instrument panel intrusion was extensive and contributed to a significant risk of injuries to the left hip and left knee and a moderate risk to the right lower leg.
