2025 Ford Ranger SuperCrew Review

By **Allyson Harwood**
Updated February 11, 2025

Pros

- Powerful engines, excellent towing figures
- Terrific off-road trim level
- Comfortable ride, modern interior

Cons

- One bed/cab combination
- Upper trims get pricey

What's New?

- New styling options
- New paint colors

Highly capable, comfortable, modern, and fast, the 2025 Ford Ranger is one of the best trucks in the midsize pickup segment. Pricing starts at $34,675.

An all-new Ranger arrived last year, and 2025 sees few changes. It doesn't really need any, as this midsize truck's improvements in power, ride quality, and the interior made an already capable truck even better. Everything that has been done to this pickup makes it even more

2025 Ford Ranger SuperCrew Safety

Safety Features & Technology

2024 features shown. 2025 may differ.

Ford Co-Pilot360

This set of driver assistance features includes forward collision warning with automatic emergency braking and pedestrian detection, plus lane-keeping assistance. It's standard on XLT and higher trims.

Blind Spot Information System (BLIS)

Also known as blind-spot monitoring, alerting drivers to vehicles in adjacent lanes or approaching at right angles when reversing out of a parking space. Probably available in the higher trims.

Front and rear parking sensors

It's always useful having help when parking, as there might be some obstacle unseen by the driver. Again, most likely an option higher up the trim level ladder.

Some ratings use a scale of Poor to Good. Others range from Basic to Superior.

Small overlap front

The small overlap front evaluation consists of a driver-side and a passenger-side component.
If the results of the two evaluations differ, then the combined small overlap rating is equal to the lower rating.

Driver-side

Tested vehicle: **2024 Ford Ranger XLT SuperCrew 4wd**
Rating applies to 2024-26 models

The Ford Ranger was redesigned for the 2024 model year. Driver-side small overlap front ratings are assigned by the Institute based on a test of a 2025 Ranger crew cab conducted by Ford.

Moderate overlap front: updated test

Tested vehicle: **2025 Ford Ranger Supercrew XLT 4-door 4wd**
Rating applies to 2025-26 models built after April 2025

The Ford Ranger was redesigned for the 2024 model year. Beginning with 2025 models built after April 2025, changes were made to the rear seat belt buckles to improve rear occupant protection in moderate overlap front crashes. (Information about when a specific vehicle was manufactured is on the certification label typically affixed to the car on the driver door or adjacent B-pillar.)

View of the vehicle after the crash showing the airbags and damage to the occupant compartment.

The rear passenger dummy's head came close to contacting the front seatback, which increases the risk of head injuries.

Rear passenger dummy injury values indicate a low risk of injury to the chest and a moderate risk of injury to the head or neck. During the crash, the shoulder belt remained in an ideal position on the dummy’s chest.

The rear passenger dummy's lap belt remained in the ideal position on the pelvis.

Headlights

Ratings are given for **2 different headlight variations** available on this vehicle.

(1) Trim level(s): Lariat trim, Raptor trim

Low-beam headlight type	LED projector
High-beam headlight type	LED projector
Curve-adaptive?	Yes
High-beam assist?	Yes
Overall rating	**A**

Distance at which headlights provide at least 5 lux illumination:

Low beams

On the straightaway, visibility was good on both sides of the road. On curves, visibility was good on the sharp left and both right curves and fair on the gradual left curve.

The low beams created some glare.

High beams

On the straightaway, visibility was good on the right side of the road and fair on the left side. On curves, visibility was good on the sharp left and sharp right curves and fair on the gradual left and gradual right curves.

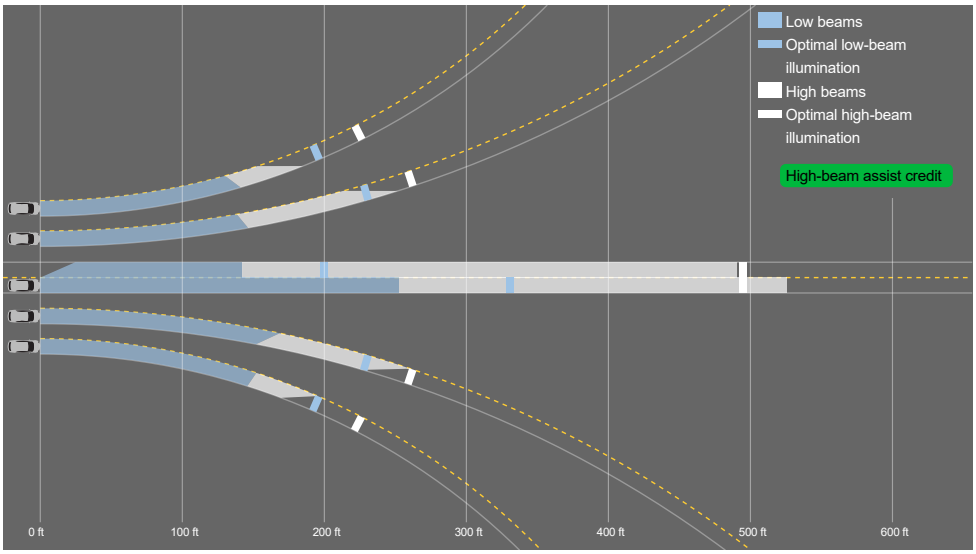

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway and on the gradual left curve.

(2) Trim level(s): XL trim, XLT trim

Low-beam headlight type	LED reflector
High-beam headlight type	LED reflector
Curve-adaptive?	No
High-beam assist?	Yes
Overall rating	**M**

Distance at which headlights provide at least 5 lux illumination:

Low beams
On the straightaway, visibility was inadequate on both sides of the road. On curves, visibility was fair on the sharp right curve and inadequate on the gradual right and both left curves.

The low beams never exceeded glare limits.

High beams
On the straightaway, visibility was good on both sides of the road. On curves, visibility was fair on the gradual right and gradual left curves and inadequate on the sharp right and sharp left curves.

High-beam assist compensates for some limitations of this vehicle's low beams on the straightaway and all 4 curves.

Making roads and vehicles safer for everyone.

The **Insurance Institute for Highway Safety (IIHS)** is an independent, nonprofit scientific and educational organization dedicated to reducing deaths, injuries and property damage from motor vehicle crashes through research and evaluation and through education of consumers, policymakers and safety professionals.

The **Highway Loss Data Institute (HLDI)** shares and supports this mission through scientific studies of insurance data representing the human and economic losses resulting from the ownership and operation of different types of vehicles and by publishing insurance loss results by vehicle make and model.

Both organizations are wholly supported by these auto insurers and insurance associations.
